We are good, Dennis is going to run home for the weekend for a break, since I will be leaving Sunday. They hit a pipe last night while digging that could have been another route for product going to the river. We will update everyone about it on the 9am call.

Great -thanks Melissa. This is what I need. But would be helpful to have the MSDS for my own files if you can send later, no rush.

You guys doing okay over there? Need anything? It should be fairly quiet today at the legislature, I can make time to come to the site if you need anything or want to discuss anything.

It was submitted under Etowah the previous name of this facility. I believe Freedom Industries hadn't changed names on most of the permits since the name change had just occurred December 30, 2013.

But attached is what we received. If you need the MSDSs for each of the products I can send that later.

Melissa

Yes. As I recall, it was discovered shortly after the spill that Freedom had no EPCRA plan on file?

Hi Mark are you referring to the tier II report? That the facility supports to the state?

Subject: EPCRA

Would either of you have the facilities status report to state and local under EPCRA?

Mark
